How did the Fund perform during the reporting period?

In the first half of 2024, the Guinness Atkinson Global Innovators Fund - Institutional Class produced a total return of 18.51% vs the MSCI World Index (net return) of 11.75%.

What affected the Fund's performance?

Fund performance can be attributed to:

- The Fund's overweight position to the Information Technology sector, and more specifically the benchmark's top performing Semiconductor industry, was the greatest tailwind to Fund outperformance, driven by both strong allocation and stock selection effects. Strength from Nvidia (+149.5% USD), off-benchmark name TSMC (+68.3% USD) and semi-cap equipment names Applied Materials (+46.1%), KLA (+42.4%) and Lam Research (+36.5%) all contributed positively to Fund outperformance.
- The Fund also benefitted from strong stock selection within Industrials, where holdings ABB (+27.6% USD) and Schneider Electric (+21.3%) outperformed the broader MSCI World Industrials index by 20.1% and 13.8% respectively.
- Whilst holding a relatively neutral position to both the Communication services and Healthcare sectors, strength from Meta (+42.7% USD), Alphabet (+30.3%) and Novo Nordisk (+40.5%) drove a strong stock selection effect within these sectors.

- The Fund benefitted from a zero-weight allocation to Energy, Utilities, Consumer Staples, Materials and Real Estate, which all underperformed the broader benchmark.
