What affected the Fund's performance?

The Fund's relative performance over 2024-to-date can be attributed to the following:

- The Fund held six of the 'Magnificent Seven' stocks that have continued to dominate developed market equity performance. The fund held Apple, Alphabet, Amazon, Meta, Microsoft and Nvidia but did not own Tesla.
- Through the year, a number of events brought 'growth' stocks into favour namely the Federal Reserve's first interest rate cut, continued enthusiasm for Artificial Intelligence and Trump's election success within the final months of the year, all benefitting Fund performance over 2024.
- The Fund's largest overweight position was to the Information Technology sector and this contributed to positive asset allocation as it was among the top-performing sectors over the year (+33.1% USD). Further, having no exposure to the weaker performing sectors of Materials, Energy and Consumer Staples provided a material benefit to performance.
- Stock selection within the Information Technology sector was the greatest detractor to relative Fund performance. The software company Adobe, (-25.5% USD), was the Fund's weakest performer over the year as the company struggled with intensifying competition and monetisation of its AI tools.
