How did the Fund perform during the reporting period?

In the first half of 2026, the Guinness Atkinson Global Innovators Fund – Investor Class produced a total return of 7.19% vs the MSCI World Index (net return) of 9.69%.

Fund performance can be attributed to:

- The Fund benefitted from its overweight position to the Information Technology sector as it outperformed the broader index (+21.6% vs +9.7% in USD). This was supported by positive stock selection within the sector as Fund holdings including Applied Materials (+181.8% in USD), KLA (+148.8%), and Lam Research (+153.5%) delivered robust returns above the MSCI World Information Technology sector.
- From an asset allocation perspective, the Fund's overweight position to Communication Services was a drag as the sector underperformed the wider benchmark (-0.2% vs +9.7%). Further, Fund holding Netflix (-23.8%) disappointed by not raising their full year guidance. This created a stock selection headwind, despite the company recently printing a solid set of quarterly results.
- The Fund saw a tailwind from a zero-weight allocation to some of the benchmark's weaker sectors including Utilities (+8.9%), Real Estate (+6.6%), and Materials (+9.3%). The headwind faced in the first quarter from having no exposure to Energy partially reversed in the second quarter, with investors rotating away from the sector as progress was made towards de-escalating the US-Iran conflict that has affected energy supplies.
